

For gestorías and accounting firms

Stop typing in supplier invoices.

Send photos or PDFs of a client's invoices. Get them back as clean rows, checked and ready to import into your accounting software.

What you get back

Every field, one row per invoice

Supplier, tax ID (NIF/CIF), invoice number, date, currency, net, VAT, IRPF withholding and total.

Doubtful values flagged, not guessed

Totals that don't add up (net + VAT – IRPF), tax IDs whose check character doesn't match, and anything hard to read.

No duplicates

The same invoice sent twice is counted once, even if the tax ID is written differently.

Example							
Supplier	NIF/CIF	Number	Date	Net	VAT	IRPF	Total
Papelería Ruiz S.L.	B12345674	F-0412	03/09/2026	120.00	25.20	–	145.20
Marta Gil	12345678Z	2026-031	15/09/2026	800.00	168.00	120.00	858.00
check: net + VAT – IRPF = 848.00, not 858.00							

How the free pilot works

01

Send me last quarter's invoices for one client: PDFs, scans or phone photos.

02

Within 24 hours you get them back in a file ready to import, with the doubtful ones flagged.

03

You check the flagged invoices and import the rest.

Free, no signup, no commitment.

Your clients' data

Documents are used only to prepare your file. Data is deleted on request, and automatically after a year.
